

Balbec brings the healthful benefits of perishable skincare inspired by traditional cultures into everyday health and beauty regimes. We use nutrient-dense ingredients that are raw, organic, live, wildcrafted, and cultivated without chemicals.

MOISTURIZING OIL

with sandalwood, vetiver & frankincense

Baobab, Camellia seed, Grapeseed, & Meadowfoam seed oils are renowned for their nourishing, healing and protective properties. As a synergistic blend they impart softness and vitality to the skin.

Frankincense is wonderful for aging skin because it is tonic and stimulates cell regeneration. It is known for its abilities to slow and deepen breath and has long been used for meditation and to calm the mind.

Emollient **Sandalwood** is anti-inflammatory and tonic.

Vetiver is anti-oxidant, anti-microbial, and balancing.

All three oils are soothing and assist in healing scars and fading blemishes. Each has mild sedative qualities and as such, promotes cell regeneration that the brain otherwise inhibits in response to stress.

Balbec facial oils are a blend of non-comedogenic nutritive botanical oils and aromatherapeutic essential oils. The botanical oils are chosen for their abilities to penetrate and hydrate layers below the epidermis and for their beneficial effects on aging, stressed, and sensitive skin. Aromatherapeutic essential oils are chosen for their balancing and relaxing qualities and for their time-honored strengths in protecting and healing the skin. Use after cleansing and toning, morning and night. Suitable for wearing under make-up.

Balbec sources ingredients through channels which are committed to sustainable practices and fair worker compensation. Each product is free of parabens, phthalates, sulfates, gluten, and chemically derived preservatives.

Please use within six months.
